Hi Scopely Team,

I am currently a Front End Software Engineer with 5+ years of experience and owner of FLMR, a full-stack marketplace for surfers, photographers and videographers built with React, TypeScript, Firebase, Node amongst other technologies. I was most recently employed as a `Senior Software Engineer (Front End)` at Acuity Brands. My responsibilities at Acuity included but were not limited to planning and executing development of a hybrid web/mobile application utilizing technologies such as React, TypeScript, RTKQuery, Git, Azure, Jest and many others.

I was also responsible for mentoring junior developers, collaborating with architects, design teams, upper management and other engineers daily under an `Agi-Fall (Agile + Waterfall)` methodology.

If I'm not writing code, there is a good chance I am either playing video games or trying to find some waves to surf or snow to ride. Being able to contribute to the game industry would be incredibly fun and rewarding as a gamer myself. I hope to learn more about the Web Engineer position at Scopely soon!

Best,
