Hi Oddball Team,

I am currently a web developer with 8+ years of web development experience and owner of FLMR, a full-stack marketplace for surfers, photographers and videographers built with React, TypeScript, Firebase and Node.js amongst many other technologies. I was most recently employed as a `Senior Software Engineer (Front End)` at Acuity Brands. My responsibilities at Acuity included but were not limited to planning and executing development of a hybrid web/mobile application from concept to production while utilizing best in slot technologies such as React, TypeScript, RTKQuery, Git, Azure, and Jest.

I was also responsible for mentoring junior developers, collaborating with architects, design teams, upper management and other engineers daily under an `Agi-Fall (Agile + Waterfall)` methodology.

If I'm not writing code, there is a good chance I am either playing video games or trying to find some waves to surf or snow to ride. Hope to hear back soon!

Michael Corseri
