

# Michael Corseri

Web Developer

📍 Bay Area, California

## Profile

A life long computer enthusiast who has found his path leading towards full stack development. Starting from the early days the first family Compaq95, to the highschool days of packet manipulation, networking and server management, to the present day of web app development. My lifetime exposure to all parts of computer workings has provided an invaluable scope of tech, where it was and where it could possibly be going.

## Experience

### Lead Web Developer + Designer @ Bio-Rad

April 2018 - Present

- Created and maintained a modular, reusable fully responsive web framework (Bootstrap inspired) utilized by marketing divisions to rapidly produce landing-pages and other web based resources.
- Introduce Atom teletype, Git and Adobe XD to department to drastically increase employee workflow.
- Utilized Marketo APIs for custom event scripting as well as full fledged Google Analytics + Tag Manager + Data Studio intergration.

### Freelance Web Developer + Designer @ STN Digital

May 2017 - Mar 2018

A high fidelity, high profile marketing agency covering the fields of TV, Media and Sports.

- Responsible for day to day asset management and handoff, custom development requests and design as needed.
- Management of WP-Multi site containing five seperate sites ranging from private to public.

### Lead Web Developer + Designer @ Newport Naval Base (Netsimco.)

Oct. 2015 - Aug. 2016

- Planned and developed the Naval Officer Master's program into a 'works everywhere webapp' from a PDF only curriculum.
- Built with Angular, Bootstrap and a few other micro frameworks
- Project was launched globally and is still in use
