23rd May, 2023

Hi THeoremOne Team,

I am currently a Software Engineer with 5+ years of experience and owner of FLMR, a full-stack marketplace for surfers, photographers and videographers built with React, TypeScript, Firebase, Node amongst many other technologies. I was most recently employed as a `Senior Software Engineer ( Front End )` at Acuity Brands. My responsibilities at Acuity included but were not limited to planning and executing development of a hybrid web/mobile application utilizing technologies such as React, TypeScript, RTKQuery, Git, Azure, Jest and many others.

I was also responsible for mentoring junior developers, collaborating with architects, design teams, upper management and other engineers daily under an `Agi-Fall ( Agile + Waterfall )` methodology.

If I'm not writing code, there is a good chance I am either playing video games or trying to find some waves to surf or snow to ride. I hope to learn more about the Frontend Engineer position with TheoremOne soon!

Best,
Mike Corseri
